Settings:

It helps users to configure the app with his/her need, share it, send feedback to the team, change language and password.

Workflow Outline:

1. Home Fragment:

- **Modules:**

- **Getting Started:** This module provides an introduction to the app, explaining its features and benefits. Users will be guided on how to navigate through different sections.
- **Consult Doctor:** Users can connect to certified mental health professionals. This could include scheduling consultations, chat sessions.

Workflow:

- Upon opening the app, users land on the Home fragment, where they can select the desired module.
- Depending on the selection, users are navigated to respective content (Getting Started → tutorials, Turning off Auto Pilot → exercises, Consult Doctor → booking form or chat interface).

2. Other Activity:

- **Modules:**

- **Stress Meter:** Users answer a series of questions, and based on responses, their stress level is assessed (low,

moderate, high). The results guide them toward specific resources or exercises.

- **Fidgeting:** Users can engage with interactive activities designed to reduce anxiety and provide a quick mental break.
- **Concentration Music:** A collection of focus-enhancing soundtracks that users can play during work or study to maintain concentration.

Workflow:

- Users navigate to this section from the home screen or bottom navigation bar.
- For the **Stress Meter**, users answer predefined questions; the system calculates the stress level and provides a result.
- **Fidgeting** involves small, engaging activities like touch-based or visual exercises.
- **Concentration Music** allows users to browse music and play their preferred track.

3. Yoga Section:

- **Modules:**
 - Users can browse different yoga poses categorized by stress-relief, flexibility, and mindfulness benefits.
 - Each pose is accompanied by a guide on how to perform it and the specific benefits it offers.

Workflow:

- Users select the Yoga tab, where a list of poses appears.

- Clicking on a pose displays a detailed guide with instructions, images, and benefits.

4. Settings:

- **Modules:**

- **Change Profile:** Users can update personal information such as name, email, and profile picture.
- **Language:** The app supports multiple languages, allowing users to switch their preferred language.
- **Password Change:** Users can update their password for security purposes.
- **Feedback System:** Users can provide feedback regarding app functionality and suggest improvements.
- **Sharing:** The option to share the app or specific content with friends via social media.
- **Logout:** Users can log out of their account from this section.

Workflow:

- Users access settings via a dedicated icon or option from the bottom navigation menu.
- Each option leads to respective screens where users can perform tasks like updating their profile, changing passwords, or providing feedback.
